Welcome to the SPIE Digital Library

The SPIE Digital Library is the most extensive resource available on optics and photonics, providing unprecedented access to more than 230,000 technical papers from SPIE Journals and Conference Proceedings from 1990 to the present. More than 17,000 new research papers are added annually.

Contents of the SPIE Digital Library

Proceedings of SPIE:	Starting at Volume 1200 (1990)*
Optical Engineering:	Starting at Volume 29 (1990)
Journal of Electronic Imaging:	Starting at Volume 1 (1992)
Journal of Biomedical Optics:	Starting at Volume 1 (1996)
Journal of Micro/Nanolithography, MEMS, and MOEMS:	Starting at Volume 1 (2002)
Journal of Applied Remote Sensing:	Starting at Volume 1 (2007)
Journal of Nanophotonics:	Starting at Volume 1 (2007)

* Some Proceedings volumes are not available in the SPIE Digital Library as SPIE does not have electronic rights to this material. [Click here](#) for a listing of those volumes.

What's New

New electronic-only journals

Two new SPIE electronic journals featuring multimedia, color images, and rapid publication debuted in January 2007. The ***Journal of Nanophotonics*** covers fabrication and application of nanostructures that facilitate the generation, propagation, manipulation, and detection of light from the infrared to the ultraviolet regimes. The ***Journal of Applied Remote Sensing*** covers remote sensing programs and experiments; methodologies for the utilization of remote sensing data; measurement characterization; satellite mission requirements and implementation, and related topics.

Journal title change

The *Journal of Microlithography, Microfabrication, and Microsystems* changed its title to the ***Journal of Micro/Nanolithography, MEMS, and MOEMS*** in January 2007.

now available

This user-defined RSS feature is designed to alert you when new content is added to SPIE Digital Library based on search criteria you specify. To use this feature, perform a search in your area of interest (either simple or advanced search). An  icon will display on the search results page. To save any search query as a dynamic RSS feed, right-click the RSS button, copy the URL, and add it to your RSS reader or RSS-aware browser. As new articles are published that meet your search criteria, you will be automatically alerted via your reader or browser.
